

Videos from UNC-CH Research Community - Guided Questions Worksheet

After watching the video(s) please answer the following questions and return this worksheet to your professor.

Answer 4 of the following questions for each video you watch:

1. What was the name of the scientist in the video and what lab do they work in?
2. What was one thing you learned from the video that is exciting to you?
3. If the scientist in the video talked about their journey to researcher was there something that surprised you about what they shared?
4. What is the big picture question the scientist in the video is exploring?
5. Find one term from the video that you did not recognize, look up the definition, and provide a summary.
6. In 1-2 sentences summarise the research project presented in the video.
7. Share one question you have after watching the video.

Answer the following question after you have watched the video(s):

1. What are the first steps you would take to find a research lab at UNC that aligns with your interests and how would you reach out to them about opportunities to do undergraduate research?
